

Gang-Run Program

Q: What is a gang-run?

A: A gang-run is when a printer has the ability to use a large printing press and paper stock to print multiple items at one time. Many printers do this with small items, like business cards, to significantly reduce the production costs. Due to the thickness of the stock we use for beverage coasters, we have to use a very large printing press to keep the stock from breaking as it moves through the press making small-quantity jobs costly. We created our extensive Gang-Run Program so that we can offer an affordable option to people who have pulpboard beverage coaster needs in quantities, at or less than, 50,000 units. Please call for pricing on quantities over 50,000; multiple version runs and custom shapes.

Gang-Run Program

4-color process/4-color process (full color)
